Continuation Sheet

Continuation of 5. because: It remains the Examiner's position that the claims are unpatentable for reasons previously of record in the final office action, mailed June 3, 2004.

1. Claims 1-4, 6-14, 16-18, 20-40 and 42-62 are pending in the application, claims 58-62 are withdrawn from consideration. Claims 5, 15, 19 and 41 were cancelled.

Response to Applicant's Arguments

2. Applicant's arguments in the response filed June 21, 2004 regarding the 35 U.S.C. §103 rejection over Hamilton et al. (US Patent No. 5,662,758) in view of Hamilton et al. (US Patent No. 5,968,633) of record have been carefully considered but are deemed unpersuasive.

Applicant argues that porous material is positioned upon the front face of the film material. As pointed out in the previous Hamilton '633 discloses that the sheet material may be provided with two active sides of surfaces (*Hamilton '633 col. 3, lines 60-61 and figure 7*). In other words, the substance, which is an adhesive (*Hamilton '633 col. 2, line 37*), is on both the front face and the back face. Therefore, as previously argued, the examiner has deemed the side with the porous material to be the back surface. Since there is adhesive on both surfaces of Hamilton '633 it encompass Applicant's "adhesive, non-raised regions" disposed on the front face of the film and the "permeable substrate layer bonded to said back face of said film."

Applicant further argues that Hamilton '633 is directed to positioning a porous material over a substance, such as a cleansing agent. As Applicant has already pointed out, the cleansing

Art Unit: 1772

cloth embodiment disclosed by Hamilton '633 is *only exemplary* (*Hamilton* '633 col. 13, lines 41-43). The embodiment in figure 10 discloses that the porous material overlies and protected the substance (*Hamilton* '633 col. 13, lines 21-22). Furthermore, Hamilton '633 discloses that the substance is an adhesive (*Hamilton* '633 col. 2, line 37) and references Hamilton '758 as representative materials for the sheet material in Hamilton '633 (*Hamilton* '633 col. 4, lines 33-39). Therefore, Applicant's argument that Hamilton '633 is not the same as providing a permeable substrate layer on the back surface of a film material where the front face of the film material is provided with a plurality of collapsible, non-adhesive protrusions is not persuasive.

3. Applicant's arguments in the response filed June 21, 2004 regarding the 35 U.S.C. §103 rejection over Hamilton (U.S. Patent No. 5,871,607) in view of Sorensen et al. (U.S. Patent No. 4,889,234) of record have been carefully considered but are deemed unpersuasive.

Applicant argues that there is no disclosure or teaching, much less a suggestion, to provide an adherent sheet material comprising at least one adhesive, non-raised region protected from inadvertent adherence to a contact surface by providing a plurality of collapsible, non-adhesive protrusions extending outwardly from the front face and providing the adhesive between the protrusions. Applicant is respectfully reminded that Sorensen is part of a 35 U.S.C. §103 rejection over Hamilton '607 in view of Sorensen. Also, it is noted that Hamilton '607 was relied upon to teach the limitations that Applicant argues Sorensen does not teach.

Furthermore, one cannot show nonobviousness by attacking references individually where the rejections are based on combinations of references. See *In re Keller*, 642 F.2d 413, 208 USPQ 871 (CCPA 1981); *In re Merck & Co.*, 800 F.2d 1091, 231 USPQ 375 (Fed. Cir. 1986).

Conclusion

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alicia Chevalier whose telephone number is (571) 272-1490. The examiner can normally be reached on Monday through Friday from 8:00 am to 4:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Harold Pyon, can be reached on (571) 272-1498. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
